PEDERATION OF LABOR.

The Federation met in regular session last Tuesday evening, President Milford Spohn in the chair, and twenty-two organizations represented. The new password for the quarter was given to the delegates. C. C. Roller, from the Eccentric Engineers, was admitted as a delegate in place of F. H. Sears.

The legislative committee reported favorably on the bill "authorizing the commissioner in charge of the census to procure certain information of public value relating to

stoner in charge of the census to procure cer-tain information of public value relating to prisons, public charities, judiciary, and po-lice not derivable from any existing reports." The report was adopted and the bill ordered to be placed in the hands of Congressmen for introduction in Congress.

Delegate Hobbs, who had been selected as chief marshal of the Lakar, Day parade re-

Delegate Hobbs, who had been selected as chief marshal of the Labor Day parade, requested the co-operation of the organizations in making the celebration a grand success. Delegate Dewart reported from the Labor Day conference that all the organizations were striving to make a creditable display, the route of the parade had been decided upon, chief marshal had been elected, and everyther paradiagate.

thing working harmoniously.

Mrs. Randall, of the Trade and Labor Assembly of Chicago, was accorded a seat during the meeting.

The following preamble and resolution, which had been laid on the table at last meeting, was on motion taken up and adopted: Whereas by unjust distribution of the products of labor and discriminating laws in favor of capital and trusts the precipitation upon the country of the panic of last summer, thereby unsertiling the value of property whereby thousands of lindustrious people have been deprived of the means of making an honest living, and who have been deluded in the vain hope of coming to

been deluded in the vain hope of coming to Washington to try and induce Congress to grart them and the country some legislation which might relieve the industrial and business de-

pression; and
Whereas many of the so-called industrial army
Whereas many of the so-called industrial army
have waited so long in the vain hope of relief
that they are now in a destitute and starving
condition: Therefore be it
Resolved. By this Federation of Labor of the
District of Columbia that we ask the District
Commissioners to devise some means to furnish
them transportation back to their former homes
and relieve the District of the burden of supporting them.

The resolution was adopted.

DISTRICT ASSEMBLY. A good attendance of delegates was present at the regular meeting of the District As-

sembly last Thursday night, Master Workman W. H. G. Simmons in the chair. The routine business was quickly disposed of. Delegates from the Musical Assembly re-ported that the charter granted to the Mu-sical League by the American Federation of Labor had been revoked, thus leaving the members of the orchestrain Kernan's Theater out in the cold.

Delegates from the Tinners' Assembly reported that at their last meeting it had been unanimously decided to celebrate their twelfth anniversary by giving a free excursion, to extend over several days, to Colonial Beach. A sufficient amount had been appropriated to defray all averages, to had not been appropriated to sufficient amount had been appropriated to defray all expenses, including board, and all other incidentals. As special arrangements had been made at reduced prices, they would extend a hearty welcome to members of other locals to join in with them.

The tinners have a large and rapidly-increasing treasury, and after discussing the tightness of the money market they decided to loosen the strings of their money bags and do their share towards relaying the treasure.

do their share towards releving the present depression. The excursion is predicted to be a grand success both as to attendance and

Delegates from Excelsior Assembly reported Delegates from Excelsior Assembly reported that at their last meeting it had been resolved to present to the District Assembly a proposition that the legislative committee formulate an amendment to the bill now pending in Congress asking for a bend issue of \$7,500,000 for improvements in this District, that in case of the passage of said bill that it be provided that all work done under its provisions shall be done by day's labor. The question was referred to the legislative committee for consideration.

was reterred to the legislative committee for consideration.

The question of recommending transporta-tion to the industrial armies was laid over for one week. Conflicting reports were made as to the desires of the so-called armies wanting

to the desires of the so-called armies wanting transportation.

The reports of the locals on Labor Day celebration were that all were in active preparation to make the affair one of success.

The election of delegates to the general assembly, which will be held at New Orleans, will take place on the fourth Thursday of this month.

AMONG THE LOCALS,

The members of Carpenters' Assembly, No. 1748, K. of L., were out in full force last Monday night. Several applications for membership and reinstatement were received, candidates elected, and will be initiated at next meeting. Members were busily engaged in settling up for excursion tickets. Discussion on Labor Day parade was general, and it was decided to issue a caff for all members to be present at the next meeting.

decided to issue a calf for all members to be present at the next meeting.

The building of the reviewing stand for the Pythian conclave was discussed with the hope that the same would be done by union labor.

DR. RIEGEL.

SPECIALIST ON

Disease of Ear, Nose, Throat and Lungs.

Catarrh, Asthma, Bronchitis, and Consumption Cured.

The above diseases have baffled the skill of physiciaus for ages and ages, and even now are considered incurable by most of them. But Dr. Riegel has mastered the secret, and with his new method can cure most any case of Catarrh.

Seventy-five per cent of all persons suffering with Consumption. Asthma, or Bronchitts who have sought his advice have been entirely cured or greatly benefited.

Diseases of the Ear and Throat speedily relieved. Enlarged Tonsils and Nasal Tumors removed without pain.

Dr. Riegel will guarantee to cure any case of

noved without pain.

Dr. Riegel will guarantee to cure any case of Seuralgia of the Head, or Sick Headache, in two

Neuralgia of the Head, or Sick Headache, in two weeks.

Asthma, Hay Fever, Bronchitle, and Consumption treated by inhalation.

His local treatment of Catarrh is mild and scothing but effectual, relieving the very worst cases in a few days.

Hearing restored in a short time. He has restored the hearing of persons who have been deaf for years, in three to five weeks.

Dr. Riegel can be consuited in English or German at his office rooms, 1234 Fourteenth street northwest.

SOLID REAL ESTATE VALUES

In Spite of Money Stringency Property Has Held Its Own.

MANY CASH INVESTMENTS MADE

Building Operations Especially Active in the Suburban Sections-East Washington Park and the Territory Between Anacostia and Benning's Greatly Improved.

Real estate has been doing very well, considering the hard times that have been hanging over the District. The wail of the croaker of course was not lacking, but it had no effect upon those who always have faith in Washington's prosperity. They said that the Capital City would withstand the troublous times, and their prediction has been verified. There has not been a rush of real estate deals, nor have any startling announcements been made of big transactions, but it has been noticed that all along a quiet movement toward a revival of business in the real estate market is going on. with indications of success.

with indications of success.

The fact that it is now easier to get money from the banks and from other sources where loans are obtained is a most flattering assurance of the resumption of business.

Some notable transactions in real estate took place during the hard times both in city and suburban properties. Many building sites were sold to people of small means who immediately put up homes.

INVESTMENTS MADE IN CASH. The investments were made in cash, too, showing plainly that this class had not felt the hard times as did those who were supposed to possess wealth. Washington main-

posed to possess weath. Washington maintained fits reputation for solidity in its business and real estate values.

A peculiar fact has been noticed within the past few months. Land that was not expected to be sold on account of the lack of facilities to reach it has been quietly disposed of and but little attention given the sales.

A trip around the suburbs will satisfy any one that those parts are not being allowed to suffer. Many little homes of moderate price suner. Many little homes of modernie price have been built during the year, many more are still in process of erection and the good work of building up those sections is likely to continue. It is the common belief now that Washington's future greatness rests in her suburban parts and the keen-eyed speculator

appears to act upon this assumption.

Active operations appear to have been resumed in Anaeostia and in the big territory that ites between it and Benning's. Large sums of money are now being expended in the work of grading and improving streets and road in the new rule of the control of th

In East Washington Park quite a building boom has been started during the past two months. R. W. Young, the yardmaster in the Pennsylvania Railroad switching yards, in front of the park, is building a large fine house on the high road between Twining City and Benning's, which will be completed by the middle of September. It will have all the latest improvements. Just have all the disinfection of the toller rooms of the city latest involvements. the middle of September. It will have all the latest improvements. Just back of this house, latest improvements. Just back of this house, fronting on Thirty fourth street east extended, R. C. Jones has started work on a handsome cottage. A little farther west, on Emmerson street, J. D. Croissant is erecting two fine press brick front houses. They are 20x54 feet in dimensions and are pretty enough to grace any aristocratic section.

R. A. Bispham, the foreman of the Pennsylvania Railroad Company repair shops, has nearly completed a beautiful home with a charming outlook toward the country and the

charming outlook toward the country and the city. This house has also large double porches and every home convenience. George L. Ammon, architect and builder, has just completed plans for a home for himself on Minnesota avenue, between E and F streats southeast. The back building is already up and occupied by his family. R. F. Bradbury, of Twining City, has purchased a lot and contemplates building a store at East Washington Park this fall. Peter Mazzullo is having plans drawn for a home to be built on Emmerson street. J. T. Linton, of Mount Pleasant, has the foundation begun for a fine house, and H. C. Owenswill also begin building a home in that park this month. harming outlook toward the country and the ing a home in that park this month.

This is a pretty good showing for the first season. There are many others who have bought lots there and are arranging to build this fall.

A surveying party from Philadelphia ha been engaged for a week making elaborate and extensive surveys opposite the park where for some time have been the founds tions for the Pennsylvania Railroad Com tions for the Pennsylvania Baliroad Com-pany's freight and passenger repair shops. The work on these buildings has for some reason, presumably the hard times, been sus-pended, and the surveying party has revived the idea that the work will now begin in earthe idea that the work will now begin in earnest. The engineers from the District office have also prepared an elaborate grade system for the whole section from Anacostia to Benning's. The chain gang from the workhouse will help to do the work of grading the park. The promoters of this park made a liberal offer to the "industrial armies" of Coxey et al. for 100 of their men to do this work, but their offer was rejected.

The contract will soon be let for grading several of the streets, and the building of a bridge across B street southeast extended, which would open up all that district lying in the southeast as far as Marlboro, and give a direct and short cut to the city, is also being

direct and short cut to the city, is also being agitated. It is claimed that there is greater need for a bridge across the Eastern Branch at this point now than there was five years ago for the Pennsylvania avenue bridge just be-

Buried in the Wrong Cemetery. taker and the officers of two cometeries by Health Commissioner Woodward cailing at-Congressman Bryan's Speeches.

THE TIMES has secured a limited number of copies of Congressman Bryan's speeches, and will furnish them to readers of THE TIMES at 25 cents per single copy, or five copies for \$1\$. They cover all the great questions now before the people—tariff, silver, income tax, election of Senators by the people, anti-option, etc. Call at office of THE TIMES and bring a copy of this nection.

Hentic to minute of the tent within a day or two the body of a man for whom a permit was issued for burial in Harmony Cemetery was buried in Mount Olivet. Dr. Woodward told a TIMES representative that he would not enforce the law in this instance, but that he certainly will do so if there shall be a repetition of the offense by any one. The penalty is a fine of from \$25 to \$200,

Results of Experiments at Havre-Danger of

How to clean streets cheaply and efficiently, passed could make polluted water or sewage odorless and sterile.

More recently at Havre and L'Orient, in France, similar experiments were accompa nied by similar successes. Speaking of those experiments before a society of engineers. Professor Drown, of the Massachusetts Institute of Technology, declared that such methods of disinfecting could not, in the strict sense, be called electrical. The action of electricity upon the properties contained in sea tricity upon the properties contained in sea water merely prepares hypochiorite of soda, and hypochiorite of soda has long been known as a disinfectant. His conclusion, therefore, is that the systems tried in New York and Havre should not be termed electrical. They are nothing more than hypochloritical, for the agent which produces the effect can be as well prepared without the aid of electricity, and, however prepared, is just as capable. But whether electricity is the direct or only the indirect agent the fact remains, and is of interest and importance, that by the use of electricity and sea water results that appear to be most beneficial have been certainly achieved.

HOW SEA WATER IS TREATED.

HOW SEA WATER IS TREATED. Sea water of itself is a very powerful solvent and antiseptic. Before any shell, large or small, reaches the bottom of the great abysms it is chemically eaten up, literally disabyems it is chemically eaten up, literally dis-solved; and when, according to recent dis-coveries sen water is subjected to the influ-ence of an electric current, a change is brought about which makes the electrolyzed sea water fatal to all forms of bacteria with which it comes in contact, both the specie

sea water intait to an iorms of occeria with with it comes in contact, both the species that require oxygen for their existence and those that do not.

In chemical terms the decomposition of a solution of salt by electricity causes the liberation of sodium at one pole and of chlorine at the other. As the sodium is immediately oxidized, and combines with the water present, a solution of caustic soda is formed. If the chlorine gas liberated at the opposite pole be not conducted away, but allowed to recombine with the caustic soda, several compounds are produced, but the principal one ordinarily is sodium bypochlorite. When the electricity has prepared a sufficiently concentrated solution of sodium hypochlorite this solution is mixed with the water or sewage to be purified.

It is reported by M. Bigaut, in La Lumiere Electrique, a Parisian technical journal, without M. H.

It is reported by M. Rigaut, in I.a. Lumiere Electrique, a Parisian technical journal, edited by M. Herz, that at Havre it was demonstrated that sewage treated with this preparation may not only be permitted to fall directly into a river without the slighest danger of contamination, but that it will even promote the purity of the stream through the disinfecting power it still possesses. And

EPIDEMIC FROM SEWERAGE. Unless previously disinfected the output of a sewer cannot be spread upon the land without menacing the public health. Epidemic processes, which electrolyze the chlorides, and above all that one in which sen water is employed, seems very practical."

hall. For this last a machine of three horse power works a dynamo coupled to the electrolyseur containing the sea water. This sea water, transformed into a chloretted solution, was driven back into an upper reser voir, from which it distributes itself in the ordinary manner through lead pipes to the

It was so arranged that after passing out of the cabinet matter and liquids flowed into a trench in the open air. All who visited this exposition have authenticated the perfect de-

cleetrolyzed sea water it is not needful to quote M. Rigaut's observations, strengthened by other authorities, further than to say that what he called the "liquid electrolique" abwhat he cannot the "liquid electrolique ab-solutely and completely destroyed all bacilli, and it was so affirmed by M. le Dr. Chaute-messe, one of the most eminent of bacteriolo-gists, "in very minute and very lengthy verifi-cations."

the quay Lombardie, near Angonieme bridge of sea water. Pipes in connection with it were laid through all the streets of the dirty quarter of St. Francis. The plant consists of two "Weyber and Richmond" steam engines of twenty-five horse power, loaned by the administration of bridges and embankments. Forward of these engines are two groups of administration of bridges and embankments, Forward of these engines are two groups of apparatus for the production of the solution required. Each group comprises a dynamo of 1,000 to 2,000 amperes, with 6 to 7 volts.

At the top of each of these six-story buildings was placed a tank, from which pipes carried the solution down to flush the closets and sinks on the various flows. In these of carried the solution down to flush the closets and sinks on the various floors. In the case of one of the houses, the now odorless refuse water was conducted through pipes to the street gutter, down which it ran some distance before it ultimately fell into the sewer. This was by way of showing to the public a constantly visible and olfactory roof of a vessel to hold the water, and a rotative pump, with pipes for supply and outlet. About 600 litres of salt water per minute were required for each apparatus.

THAT UNEQUALED SUMMER SALE OF FINE SHOES

At Crocker's has lost none of its attractions --- still the same "crowddrawing" offers. But the stock is getting down. Can't tell when the end of the sale will be.

W., and from our arents at denot.

SWAMPED BEYOND RECOVERY.

Their Son's Suit for Injunction Alexander J. Gill, Theresa M. Gill, and Florence H. McCartney, as defendants in the suit for an injunction brought against them by William S. Gill, of the candy manufacturing firm of Gill & Son, have filed their answers. The father, Alexander J. Gill, states that he gave up a lucrative position in Fittsburg, Pa., at his son's request, and came to this city and entered into a partnership with the complainant, in the manufacturing part of the business of Gill & Son. His son, he of the business of Gill & Son. His son, he says, retailed entire charge of the sales and financial department. He purported to keep the books of the firm, but the defendants all aver that there was no accurate account kept of the firm's affairs. The bookkeeping recof the firm's affairs. The bookkeeping rec-ords consisted merely of pocket memoranda.

"The firm's indebtedness is nearer \$5,000 than \$3,000," says Mr. Gill, "and if an honest accounting of the receipts and profits from February 7, 1891, to July 13, 1894, could be obtained, it would be shown that the firm would not now be insolvent." Mr. Gill, sr., also denies his son's allegation that he

designed to acquire without consideration the good will of the business; that it is in any way whatever of sound financial value; that he is in possession of property belonging to the firm; that there is anything in the establishment of any substantial value, or that the good debts due to the firm amount to \$400. good dents due to the firm amount to \$400.

Theresa M. Gill corroborates her husband's statements, in her affidavit, and adds that so far from there being any collusion upon her part to injure her son in his business, through the mismanagement and extravagance of her son, the business, which otherwise would have been prosperous, has been entirely ruined, and with it the finances of her husband ruined, and with it the finances of her husband and herself. She states further that the disagreement in business was caused by the state of the firm's affairs and not by any petty matter, such as the employment or discharge of a cierk. Her son, she avers, had swamped the business beyond the possibility of recovery. The suit will come before Justice Bradley to-morrow on the motion for an injunction.

RECORD OF THE COURTS.

ORPEANS' COURT, PROBATE DIVISION, Justice Bradley—in the estate of Mary Beckett Henry C. Craig appeared before the court and proved death of his father and the signature to the will.

A. Preston Bunlap; estate proved, bended and and qualified. William E. Matthews' estate, Robert Christy and John Ridout, as collectors, appeared before the court and gave bonds for \$6,000 each, proved and qualified. In rethe estate of Fannie Jackson; James R. Wildner as administrator proved, bonded and qualified; bond, \$5,000. Estate of Arthur A. Naucz, will proved by third witness; order admitting will to probate signed; letters testamentary granted to Oscar Nauck, who is also made guardism of minor children.

Circuit Court, Justice Bradley—No session.

Transfer of Northwest Property

Sarah E. Crook and her husband, Harrison Crook, have, by deed dated August 9, 1894, transferred to Margaret A. Clair, of this city, two city lots Nos. 81 and 82, in square 808, for \$9,750. The deed was recorded yesterday. The property is located between H and I and Fourth and Fifth streets northwest, and is encumbered by a deed of trust for \$5,500, which the purchaser assumes. Boiler Compounds are chemically pure, and are gradually working their way gratually working their way to the front, riving entire satisfaction whenever used. They remove and positively prevent scaling; they neutraine acids, sulphur, and mineral waters, contain no acid—and will not foam under the highest pressure.

17 Be convinced of their merits—send for a trial order.

WASHINGTON, D. C.

A. MINSTER.

EDMONSTON'S WEAR WELL

FOR LADIES AND GENTLEMEN,

decided to take an active part in the Labor Day parade, and will turn out about 190 strong. The gavel presented to the Building Trades' Council by Malcolm Braton, of this union, was made from mahogany from the residence of Mrs. Dollie Madison, daughter of President Madison, and the handle from the residence of Senator John Sherman. The gavel is a fine piece of workmanship and reflects credit on the maker and proves the kind of material the electrical workers are composed of. To become a member of this organization the candidate is put through a thorough examination before being admitted. The result is that none but competent mechanics get into the union. The last report showed every member at work. This union is out in a prepared digest in which they ask the co-operation of all trades to strengthen their cause in their branch of the building trades and where possible work harmoniously with union electrical workers.

The Bakers' Assembly held a rousing meet-The Bakers' Assembly held a rousing meeting last Saturday night. The meeting was an important one. District Master Workman Simmons was present the first part of the meeting by request and made statements relating to the case of a worthy member in distress, as reported in last Sunday's Times, and a very handsome donation was contributed for the family. The business of this assembly, owing to its large membership, is such that it has been decided that it would be for the best for the drivers connected with the assembly to form an assembly of their own.

The bakers and drivers have mutually agreed upon this. The new organization will

The bakers and drivers have mutually agreed upon this. The new organization will be regularly organized to-morrow night at their hail on Seveath street, when it is expected that nearly every baker's driver in the city will be present.

The question of turning out on Labor Day was, to say the lenst of it, a complicated one. The barriers in the way of bakers taking part seemed to be innumerable. The Pythian conclave and the large number of visitors that are exjected here the week before Labor Day will keep the bakers busily employed. Then, again, Labor Day occurring on Monday does not help matters, as it is customary to bake again, Labor Day occurring or anonavy one not help matters, as it is customary to bake bread on Saturday to last over till Monday morning, but to inflict a dose of stale bread on the public until Tuesday morning was rather more than the bakers wanted to do. But the bakers wanted to be in the parade.

But the bakers wanted to be in the parade. After discussion, patriotism to the cause gained the day and they will be represented in the parade. It is understood that, to do justice to their bosses and the public, the bakers will only absent themselves from the bakeries during the time of the parade, Carpenters' Union, No. 1, has decided to carpenters Union, No. 1, has decided to call a special meeting of the members for August 22 to make final arrangements for the Labor Day parade. At the last meeting the policy of The Washington Times was under discussion, and it was unanimously decided that the paper under the present management has been decidedly for the better, both adjustified and in the news columns.

editorially and in the news columns. The Plasterers' Assembly decided to have a called meeting for to-morrow night, when full arrangements will be made for the Labor Day parade. It has been already decided to have a uniform appearance as to dress of the members. New flags will be bought for the occasion, also a new banner. In another column will be found their advertisement.

Local Union, 190, of Carpenters and Joiners, met in regular session last Monday night.

A committee consisting of President Lomax, A committee consisting of President Lomax, Brothers Heisley and Perry were appointed to secure more commodious and comfortable quarters. This committee has been instructed to co-operate with the other carpenters unions and other labor organizations with the other carpenters. the object in view of securing a building with halls to accommodate the meetings and a room on the ground floor to be used as a reading-room where members can pass away their idle time. On the wails of the reading-room will be blackboards where matters of interest to members can be written. A book interest to members cut of employment can in which all members cut of employment can register will be kept. A telephone will also be put in so that any one desiring help can speedily be supplied with union workmen. The more is no experiment, for such insti-titions are in successful operation in several

inrge cities in this country.

It is to be hoped that other labor organizations will come forward, take hold and help push this matter, as it will be a great advantage to union men in securing employment and will provide a piace of instruction and A building of not less than three stories,

centrally located, is desired. Any person having such a building to rent, and any or-ganization desiring to co-operate will please address E. J. Lomax, chairman of the committee, No. 1008 C street southwest. The Eccentric Association of Steam Engineers, at their meeting Friday night, trans-acted some very important business pertain-ing to the welfare of that organization. Raising of the initiation fee has not hurt the organization as predicted, for there has

without an application for membership has being received.

The committee on Labor Day parade reported that they had engaged part of the National Guard Band for that occasion. The committee appointed to procure a steam en-gine to run the press from which the Labor Advocate is to be printed, reported that they had been successful in their efforts. A movement is now on foot to organize a musical band of steam engineers for the

parade of next year. A prominent member of the order addressed the meeting on what the labor organizations of the District of Colum-bia had accomplished in the way of legislation. bis had accomplished in the way of legislation, viz.: National eight hour law, free text books for the public schools, Labor Day holiday, and last but not least a law regulating steam engineering in the District, which all must admit has been the cause of much needed re

Brother Boyd, of the Musical Assembly, pdid a fraternal visit and received a hearty welcome, which is always extended to all visiting brothers. The labor conference committee of Colum his Typographical Union is working hard to make the affair a grand success. The chair-men of the respective chapels have met with the committee on several occasions. Another meeting will be held at the Temple to-day at meeting will be held at the Temple to-day at 2:30 p. m. The members of the chapels are striving to outstrip each other as to appearance in the parade. The Times chapel seems to be in the lead so far, having decided upon a uniform. They will also have a handsome banner, which will be presented by Mr. Conn. The other chapels will probably be satisfied to appear in line dressed in dark clothes with cane and badge.

Tournament at River View. Capt. Randall's eighth annual tournamer and dress ball for professional and amateur knights will take place at River View on Wednesday, August 15. These annual contests of the daring gentleman riders from Prince George's, Fairfax, Montgomery, and Charles counties, the crowning of the queen, and the dance that follows are pleasant reminders of ye colonial days of sport and pastime. The various tournaments held in Maryland and various tournaments held in Maryland and Virginia develop enthusiastic kaights, where they can meet for final contest at River View. The orators of the day will be Richard E. Brendt, of Mariboro', and E. B. Hay will be the orator of the evening, and this year Capt. Randall proposes to make a great day of the event. The Samuel J. Pentz will leave at 9:45 a. m., 1:45 p. m. and 6:30 p. m. and Harry Randall at 5 and 7 p. m.

Marriage License.

Licenses to marry were issued yesterday to the following: William F. Mealy, jr., and Frances C. Jackson, both of Washington; Peter H. Moore, of Duplain, Mich., and Peter H. Moore, of Duplain, Mich., and Muree E. Thomas, of Anacostia, D. C.; Luther W. Edmonston and Margaret Hubert, both of Washington; Alphonzo Woodson and Annie Waddy, both of this city; John M. Handschuh and Emma F. Wagner, both of Washington: Charles Thomas and Belle Butler, both of Georgetown; Charles H. Pemberton and Margaret J. Evans, both of Washington; Ferdinand Emmerich Leirner and Georgia Bickley, both of Washington; Alfred E. Mueller, of New York city and Julia A. Bogul, of this city. E. Mueller, of New Yo Bogul, of this city.

SANITATION AS A FINE ART

Practiced More Generally in Europe Than in America.

PURIPICATION BY ELECTRICITY

Using Unpurified Sewage for Fertilisation -How Electricity Has Simplified the Great Question of Treating Garbage.

how to purify the supply of water, and how to dispose of sewage salubriously is the triply difficult problem which sanitary science has not yet unriddled to the satisfaction of large communities. During the past five years several experiments have been made with electricity, but up to last summer it was not demonstrated that electricity could render any great or valuable service to sanitation It was then shown, in a test conducted before the New York board of public works that salt water through which electricity had been

disinfecting power it still possesses. And still the sewage is not used as a fertilizer, which is a recommendation of the system to persons who fancy that the sewage of great towns can be turned to "good account."

of cholera have been caused by sewage so distributed without having been deprived of its bacteria. In England, M. Ricaut says, "they have so well comprehended the inadvisability of spreading out the sawage as it comes that to-day a number of cities do not practice it until preliminary disinfection. Processes of disinfection are numerous, but the electrical

"The houses, chosen by M. David, architect of the city, as particularly unhealthful, were selected for the application of the Hermite system to dwellings, the purifying qualities of electrolyzed sea water. Disinfection seemed complete."

To the electrical systems, so called the chief objection in America has been the cost. Mr. Hermito has estimated that an expense of 40 cents per year for each inhabitant would install a plant and secure the disinfection of the city's entire sewage, "Which is to say," remarks M. Rigaut, "that the electrolytical processes is not dearer than other processes."
